

Keypasco Announces New Chief Technology Officer

Gothenburg, February 20, 2013 – Keypasco AB, a strong authentication service provider and Cloud security specialist, is proud to announce the appointment of Anton Ljung as the new Chief Technology Officer.

Anton's background and experience can be found in a wide range of roles within the software industry, covering areas such as R&D, operations and sales. He has experience and knowledge within his focus areas; security and mission critical systems applied to enterprise, automotive and mobile platforms. He believes simplicity is key to success and holds a Master in Computer Science and Engineering from Luleå University of Technology.

"I believe Keypasco has a new way of approaching the online security industry and the bottom-line idea of how to provide security is new and exciting. Based on the patented technology, we can offer the industry a unique and revolutionary new authentication solution affordable for each user and service provider, and I look forward to being a part of the challenge and success."
Commented Anton Ljung.

Anton Ljung will be responsible for all Technical Services in Keypasco Software solutions and will take a leading role in determination and implementation of future solutions.

About Keypasco

We are at the heart of our rapidly changing digital culture. As with all paradigm shifts, there will be new challenges. Some of the largest challenges with cloud services are security and integrity, crucial factors for success and sustainability. With more than 20 years of individual experience in IT security, Keypasco's founders are the minds behind some of the revolutionary two factor authentication technology solutions used by leading Internet banks today. We deliver on society's expanding needs for personal authentication services, identity protection, authenticated online services, cloud computing access, eCommerce, eGovernment and eBanking services. Keypasco's vision is to be a leading supplier of services for securing cloud services.
