Keypasco launches Android & iOS applications for BYOD and OOB security

Gothenburg, May 20th, 2013 – Keypasco is launching Android and iOS application Vakten to offer multi-factor authentication and premium protection of users' identity online. The applications will function as a part of Keypasco's official Security as a Service (SaaS) solution as an Out-Of-Band (OOB) security and a secure way to bring a personal device (Bring Your Own Device, BYOD).

Both applications are now available to download in associated application stores such as Google Play and iTunes/App Store).

The Vakten application and the Out-of-Band functionality can be used to gain access through web login and to proceed with payment verifications connected with different Internet Content Providers. The application can also note the unique identifiers of the device to create a device fingerprint to connect to the Keypasco SaaS solution.

Vakten can also use the BYOD functionality in combination with the device fingerprint provided by the application to utilize a proximity solution where web login authentication and payment verification is limited by physical distance to the mobile device.

About Keypasco

We are at the heart of a rapidly changing digital culture. As with all paradigm shifts, there will be new challenges. Some of the largest challenges with the Cloud services are security and integrity, crucial factors for success and sustainability. With more than 20 years of individual experience in IT security, Keypasco's founders are the minds behind some of the revolutionary two-factor authentication technology solutions used by leading Internet banks today.

Keypasco develops a secure software-based authentication solution that is designed and customized to be used on trusted devices. Keypasco manages the software through its entire lifecycle, as well as the confidential data it contains. We deliver on society's expanding needs for personal authentication services, identity protection within Internet banking, online gaming, eCommerce, mobile Commerce, mobile payment and eGovernment. Keypasco's vision is to be a leading supplier of services for securing cloud services.
