keypasco

What We Offer

Your deviceID - as unique as your DNA

Instant security for you, and ALL of your customers

Imagine that you could upgrade the security for 100% of your online customers without them even knowing it!

Keypasco offer a new software-based solution that is easy to integrate within your existing systems. The quick implementation is done through a silent rollout and instantly secures the digital identity of your customers.

The Keypasco solution is flexible and self-scalable and provides you with a unique evolving risk engine for continuous improvement of your security, great privacy and integrity protection and a blacklist of fraudulent devices. ***Your vision is what we already do!***

Security By Your Own Device!

Security is an on-going problem for any company that uses a login for their services. Often we are stuck with inadequate existing solutions and it is easy to be discouraged by all the work involved with implementing a new one. But, by challenging the traditions and making things easier and more human we believe we can make the Internet a safer place. This is why we create the Keypasco products and services.

Benefits with the Keypasco Solution:

- Convenient and easy mass rollout for any number of users
- Quick and easy integration with your existing solution - no change in established user behaviour
- Works in the background and guarantees the security
- Privacy and integrity protection
- Unique deviceID risk engine for continuous improvement of your security
- Skip passwords and tokens
- No distributed credentials = nothing to steal

The unique Keypasco Solution:

Traditional solutions for online authentication stores personal information such as name, ID number, photo, phone number, email address, home address, account numbers and credit card numbers in databases, Keypasco do not collect nor store this type of information.

In addition, your traditional Digital ID consists of Password and Key = Distributed credentials. And credentials can, and will be stolen.

The Keypasco solution provides you with your own Digital Identity based on your Device properties, location and proximity to any external device you chose to be a part of your device properties.

With our DeviceID solution, there are no distributed credentials to be stolen!
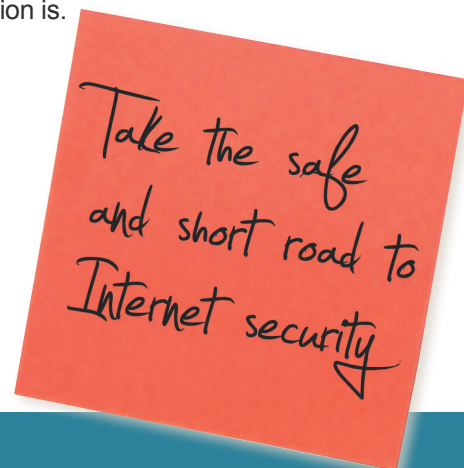

We can secure your services

The Keypasco technology can be used by a wide range of applications for digital signature, authentication and access control such as:

- Internet/mobile banking, mobile payment, cardless ATM withdrawal and transactions
- Online gaming, online betting, eCommerce, ticket reservations
- CRM, email
- eGovernment, healthcare
- Smart Home, private automobile, car rental, car sharing
- Innovative FinTech services
- Smart Data Mining – the right information at the right time

Patented and award winning

Keypasco holds several patents that are granted in most of the world's leading IT-nations such as Korea, Japan, China, Taiwan, European Union, Singapore and the United States.

Our prizes and awards are further proof of how innovative the Keypasco solution is.

Take the safe and short road to Internet security

About Keypasco

By using the unique device ID on the end-user's own device, like a smartphone, tablet or a desktop/laptop computer, we can make sure that a username and password only works on the right device and in the right location. To ensure a convenient user experience the cutting-edge technology is working in the background to maintain the security behind the provider's ordinary application interface.

Since the start in 2010 Keypasco's award winning solution has contributed to a paradigm shift within Internet security. Keypasco's unique patented solution uses a revolutionary new technology for user authentication and provides security to online service providers and users.

The Keypasco solution opens up for new innovative business models and enables the creation of new services. Today our products provide mobile security to millions of users across the world. *Keypasco - Security By Your Own Device!*
